

CHS Series 7 & 8

Apple® iOS Solutions

Made for
iPod iPhone iPad

Does your business need a fast barcode scanner for the iPad®, iPad mini, iPhone® or iPod touch®?

If barcodes are crucial to your business, don't settle for slow, tedious scanning with a phone camera. Socket Mobile offers a wide range of Apple compatible 2D and 1D cordless barcode readers perfect for either basic data entry or advanced data collection with customized features.

Hardware Options

CHS Series 7

- Optimized to be balanced in hand
- Best choice for iPad
- Many colors, performance levels and durability options
- Common development tools (SDK)
- Apple MFi certified

CHS Series 8

- Optimized to slip easily into pocket
- Best choice for iPhone & iPod touch
- Attach to iPhone or iPod touch for one-handed scanning solution
- Use attached or detached
- Common development tools (SDK)
- Apple MFi certified

Usage Options

The CHS Series 7 and Series 8 support two types of wireless connections to suit different scanning requirements.

Bluetooth HID Mode

Fast and Simple

- Works out of the box, no software installation required — easiest way to connect!
- Scanner connects like a wireless keyboard
- Enters data “as is” into active cursor field of any iOS application
- Easily open or close iOS on-screen keyboard by pressing a button
- Ideal for prototyping, proof of concept, and budget approval

iOS Mode

Robust, Advanced Functionality

- Requires installation of native iOS application developed with SocketScan 10 SDK, see examples at: <http://www.socketmobile.com/appstore>
- Supports advanced scanner control, data extraction and manipulation
- Scanners have special authentication chip to enable two-way communications with iOS devices (Bluetooth Serial Port Profile)
- No active cursor field required
- Ideal for robust, dependable deployments

The CHS Series 7 is the #1 barcode scanner for tablet-based point of sale!

SocketScan 10 Software Development Kit (SDK)

- For developers to embed support for CHS Series 7 and Series 8 into their apps
- Use the same API to add RedLaser support for scanning with a tablet/phone camera
- Supports advanced scanner control, data extraction and manipulation
- Libraries for Apple iOS, Android, BlackBerry and Windows included
